INTRODUCTION

"Start focusing on what needs to be done – Not what is politically feasible!"

Greta Thunberg

2020 is a year of change. The Corona pandemic has confronted us all with new challenges of a societal, political, ecological and economic nature. It has brought about changes in many areas of our everyday lives – but change in itself is something that can be creatively steered: should we go back to business-as-usual, or pave the road to an ecologically and socially desirable future for us all? The pandemic-related reduction in CO₂-emissions was a good starting point, but it is not enough.

The global climate emergency still remains a pressing problem. The pandemic has exposed not only the complexity, but also the instability of both our economic and financial systems. At the same time, it has opened the door for alternatives. Humans are part of the overarching system they have created and they have the ability to alter it.

Our economic system has developed from a needs-oriented function to one striving only to maximize profits. The way in which it works today leads to exploitation of natural resources and plays a significant role in climate change. However, what is often overlooked is the basic element our economy is built upon: money. The financial system, with its unregulated banking and speculative practices, and the dynamics of compound interest contribute to ecological degradation and a systematic redistribution of wealth to the richest part of the population.

For the first time in a digital format, the Summer School "Alternative Economic and Monetary Systems" has highlighted necessary changes in both the economic and financial systems and has also focused on what can be done on an individual level.

The AEMS, which took place from 20th July to 7th August, welcomed 36 participants from 17 nations and 5 different time zones. Students explored mainstream and alternative economic and monetary models. They learned about the interactions between society, the economy and environment and why a drastic change is needed in order to stabilize the global temperature increase below 2°C.

The program featured not only video-lectures, but also simulations and workshops, as well as an interdisciplinary group project on the topics of economic growth limits, financial crises, climate change, ecosystem boundaries, demographic change, and other developments of high global and national relevance.

Alternative ways of thinking and pioneering visions are more relevant than ever! The time for change is NOW. Maybe the unforeseen way in which 2020 played out was the push we needed.

We would like to thank all participants, speakers, partners and sponsors for making AEMS a continuing success. All your support in realizing our ideas for a more sustainable future is much appreciated.

Best wishes from the AEMS Steering Committee,

Guenther Jedliczka (OeAD student housing),
Carina Kamptner (OeAD student housing),
Petra Isepp (OeAD student housing),
Helga Kromp-Kolb (BOKU University),
Mathias Kirchner (BOKU University),
Ernest Aigner (WU Vienna),
Halliki Kreinin (WU Vienna), and
Christina Buczko (Academy for the Common Good).

ALTERNATIVE ECONOMIC AND MONETARY SYSTEMS

"The significant problems we face cannot be solved at the same level of thinking we were at when we created them."

Albert Einstein

The Summer School is the result of a cooperation between OeAD student housing, the University of Natural Resources and Life Sciences, Vienna (BOKU) and representatives of the Economy for the Common Good (ECG). Together we aim to raise awareness for the necessary shift in our economic system, because "there is no alternative for alternatives!". The organizers are supported by the vast knowledge on alternatives to the predominant economic and monetary systems of Helga Kromp-Kolb and Mathias Kirchner (both BOKU), Ernest Aigner and Halliki Kreinin (both Vienna University of Economics and Business) and Christina Buczko (Academy for the Common Good). Wolfgang Lalouschek (planetYES) contributes through the important theme of coping with change, not only on an overarching global scale, but at an individual and personal level. Furthermore, the numerous academic and scientific partners of the AEMS provide valuable input from the latest publications in their respective fields.

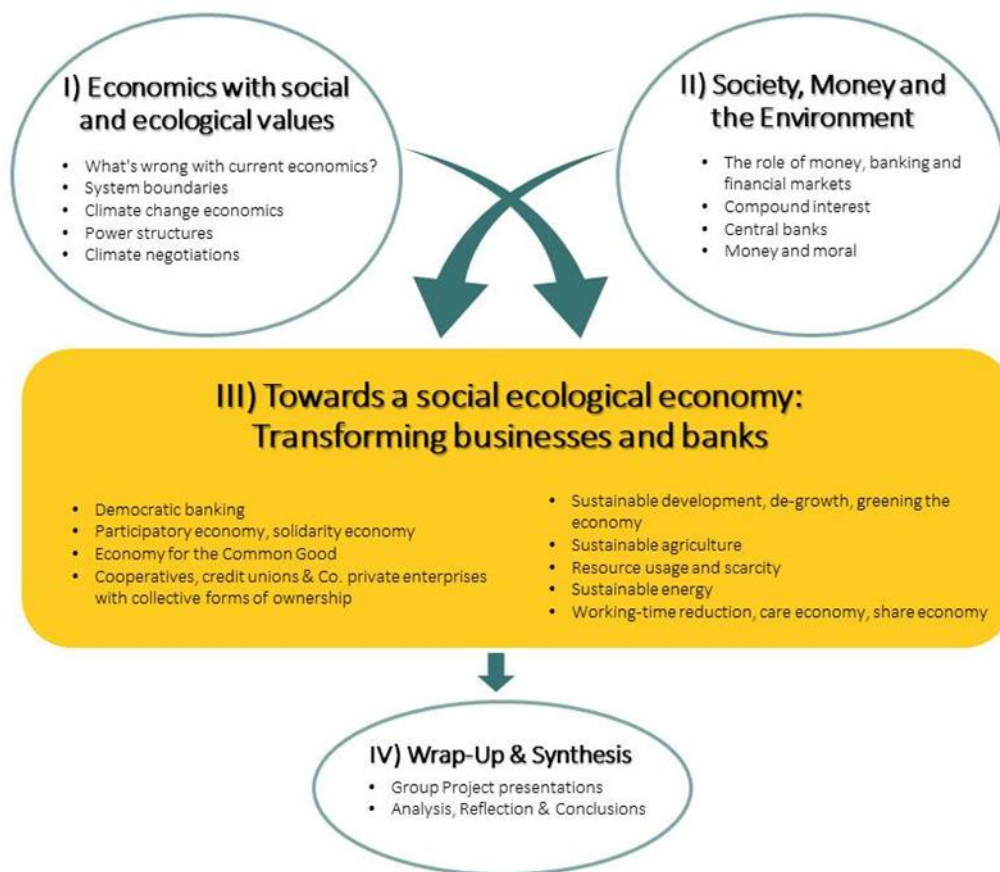

AEMS is a combined effort to create an academically open event for students and professionals from all walks of life, to learn more about the current socio-economic climate and to explore real alternatives. Participants are guided through the summer program by Helga, Ernest, Mathias and Halliki. They support the participants in getting a clear picture of the connections between the various topics and speakers' views.

Lead by example - that is the motto of AEMS. That is why we take many measures to make the AEMS as climate friendly as possible:

Certified as an EcoEvent in accordance with the criteria of the City of Vienna, the Summer School especially focuses on environmentally friendly behavior. Measures taken therefore include: exclusively vegan and vegetarian catering with regional and seasonal products at the grand opening event; exclusive use of environmentally certified paper for all print materials and print on demand; information for participants on the availability of public transport and proper waste separation, or waste avoidance etc.

Digital media offers unprecedented possibilities for changemakers and pioneers from all around the world to foster connections and collectively engage with the political agenda, with no spatial and/or time limitations. Therefore, the Summer School also strives to offer a platform for international exchange and global networks to share ideas.

By avoiding travel, this year's program also had a much lower carbon footprint, all contributing to a healthier environment, whilst still providing great opportunities to connect with people from all over the world within an immersive online experience.

CURRICULUM

"Dare to know! Have the courage to use your own intelligence!"

Immanuel Kant

The program of the online-AEMS has been adapted to fit the needs of the international participants taking part from all over the world. Live-sessions were scheduled to take place in the afternoon for those on Central European Time, to allow students from the Americas or Asia to attend in their respective mornings or evenings.

During the preparatory phase, students read introductory literature and complete a preparatory exercise. This allows for an easier participation during the AEMS program.

The lecture phase is spread out over three weeks and comprises of four modules building up from the preparatory work. Self-study periods with online-lectures, as well

as live-sessions with time for questions and discussion and simulation games, are featured to enable a deeper understanding of complex interrelationships:

Economics with social and ecological values. Module 1 gives an overview of the current global socio-economic situation and discusses what makes transformation necessary. Students understand the connection between the idea of endless economic growth, system boundaries and climate change.

Society, Money and the Environment. Module 2 focuses on the role of money, international banking systems, financial markets and ethics in the monetary system. The main question here is "How can

financial markets serve the broader interests of society rather than dominate them?”. In this module alternatives, such as complementary and regional currencies, are also discussed.

Towards a social, ecological economy.

Module 3 is the main part of the Summer School. It enables students to view available alternatives for reforming the economic and financial systems from a holistic perspective. Areas discussed include democratic banking, de-growth, work reduction and sustainable agriculture.

Bringing about change is not an easy endeavour - cooperating and forming

groups is essential. A part of Module 3 therefore consists of group work projects: The aim here is to develop a project for systemic change which addresses and overcomes a social, ecological or economic challenge. The project should be related to challenges discussed during the summer school. In addition to the group project, all participants write blog posts that are published on the AEMS website: <http://www.summer-university.net>

Wrap-up and synthesis. Module 4 gives students an opportunity to reflect and consolidate the many issues and concepts they have heard of and experienced over the previous three weeks.

Week I: Economics with Social and Ecological Values

	Time (CEST)	Type	Opening: Fighting climate change in times of health and economic crisis.	Lecturer
Monday, 20 July	13:30	Check-in	AEMS participants Get-together	AEMS team
			Value Brainstorming: A Good Life for All?	Ernest Aigner, Helga Kromp-Kolb
			Public Opening Event:	
	17:00		Official Welcome and Introduction	Günther Jedliczka, Helga Kromp-Kolb, Karin Stieldorf, Hubert Hasenauer
	17:30		Some concrete steps in the transformation process towards a sustainable society	Stephan Schulmeister
	17:45		Only one planet: Boundaries economy must respect	Helga Kromp-Kolb
	18:00		Sustainable design and planning matters	Karin Stieldorf
			Break	
	18:45		The transformative role of Austrian climate policy at national, European and international level	Leonore Gewessler
	19:00	Panel Discussion	Fighting climate change in times of health and economic crisis.	L.Gewessler, S. Schulmeister, H. Kromp-Kolb, K. Stieldorf
Socioeconomic theories on social ecological struggles				
Tuesday, 21 July	13:30	Check-in		
	14:00	Session 1	Basics: Plural economics. Nature and money in economics: a pluralist introduction.	Ernest Aigner, Mathias Kirchner
	15:00	Group session	Explanations about group work and students work	
	16:00	Session 2	Basics: Climate change economics	Mathias Kirchner
	17:00	Check-out		
Biophysical limits and climate change				
Wednesday, 22 July	13:30	Check-in		
	14:00	Session 1	Resilient socio-economic systems Biophysical limits to growth and Corona Introduction in Ecological Economics	Thomas Hahn Brian Fath Sigrid Stagl
	15:45	Group Session	Finding project ideas	
	17:00	Check-out		
Strategies, interventions and measures for political-economic and social-ecological change				
Thursday, 23 July	13:30	Check-in		
	14:00	Session 1	Economic perspectives on new opportunities for tackling social ecological crisis due to corona Power structures and change inhibitors	Karl Steininger Christian Zeller
	15:00	Group session		
	16:00	Session 2	Strategies of Extinction Rebellion, Fridays for Future and System Change not Climate Change Developing programmes and strategies for societal change	Patrick Scherhauer Mira Kapfinger
	17:00	Check-out		
Climate Negotiations				
Friday, 24 July	13:30	Check-in		
	14:00	Session 1	Simulation of climate negotiations.	Helga Kromp-Kolb, Mathias Kirchner, Ernest Aigner, Wolfgang Lalouschek
	17:00	Check-out		

Week II: Society, Money and the Environment

	Time (CEST)	Type	International institutional and financial markets	Lecturer
Monday, 27 July	13:30	Check-in		
	14:00	Session 1	Understanding Money, Banking and Financial Markets International Money Institutions	Peter Wahl Kurt Bayer
	15:00	Group session		
	16:00	Session 2	Regulating financial markets to serve society and environment?	Thierry Philipponnat / Finance Watch
	17:00	Session 3	What's wrong with current financial system from an environmental perspective?	Irene Monasterolo
Central banks and sovereign money				
Tuesday, 28 July	13:30	Check-in		
	14:00	Session 1	Compound interest and international debts.	Thomas Kubo
	15:00	Group session		
	16:00	Session 2	Introduction in sovereign money Positive money and climate change	Christian Felber Fran Boait
	17:00	Check-out		
Alternatives to fiat currencies for regionalisation				
Wednesday, 29 July	13:30	Check-in		
	14:00	Session 1	Money and Moral Central banks and digital money	Bernd Villhauer Beat Weber
	15:00	Session 2	What's wrong with the current financial system and central banks	Richard Werner
	16:00	Session 3	Purpose-driven Tokens: Tokens as a policy tool Regional basic income for local economies	Shermin Voshmgir Alf Hornborg
	17:00	Check-out		
Restructuring globalisation for resilient economies				
Thursday, 30 July	13:30	Check-in		
	14:00	Session 1	Universal Basic Income Universal Basic Services and Climate Policies	Maximilian Kasy Ian Gough
	15:00	Group session	Harvest game	Helga Kromp-Kolb und Mathias Kirchner
	16:00	Session 2	Deglobalisation Deep adaption	Andreas Novy Helga Kromp-Kolb
	17:00	Check-out		
Work, environment and just transition				
Friday, 31 July	13:30	Check-in		
	14:00	Session 1	The refusal of work Degrowth, work and the environment Working time reduction in the context of climate change	David Frayne Stefania Barca Ernest Aigner
	15:00	Group session		
	16:00	Check-out		

Week III: Towards a social ecological economy: transforming businesses and banks				
Time (CEST)		Type	Economic democracy and alternatives to industrial agriculture	Lecturer
Monday, 3 August	13:30	Check-in		
	14:00	Session 1	Economic democracy Communal politics for alternative businesses and banks.	Alexandra Strickner Gwen Hallsmith
	15:00	Group session	Visions from other continents	
	16:00	Session 2	The future of food and agriculture Alternative Foodways: Community Supported Agriculture and Foodcoops	Thomas Lindenthal Friedrich Leitgeb
	17:00	Check-out		
Regional politics, public provisioning, and Degrowth				
Tuesday, 4 August	13:30	Check-in		
	14:00	Session 1	Utopias Local supply chains and human and social resilience.	Lino Zeddies Wolfgang Lalouschek
	15:00	Session 2	Regional and complementary currencies	Giuseppe Littera
	16:00	Session 3	Strategies for degrowth Economy for the Common Good	Nina Treu Christian Felber
	17:00	Check-out		
Wednesday, 5 August			Group work with feedback sessions.	
Thursday, 6 August			Group work with feedback sessions.	
	15:00	Group Session	4 Group presentations	
Friday, 7 August			Presentations of Group Works	
	13:30		5 Group presentations	
	15:30		Final wrap-up	
	End: approx. 17:30			

Mural on the contents of the lectures of Thomas Kubo, Christian Felber and David Barmes

NEW POSSIBILITIES - AEMS GOES DIGITAL

"In all affairs, it's a healthy thing now and then to hang a question mark on the things you have long taken for granted."
Bertrand Russel

For the first time this year, the AEMS summer school took place completely online.

The course consisted of online discussion, self-study, online group projects and educational games. All presenters were asked to record a 30-minute presentation on their topic and to provide additional material such as scientific articles, newspaper clippings, blog posts, videos, etc. In the mornings, students had time to listen to the presentations and work through the additional material. Based on this, it was their task to answer the following questions before the respective

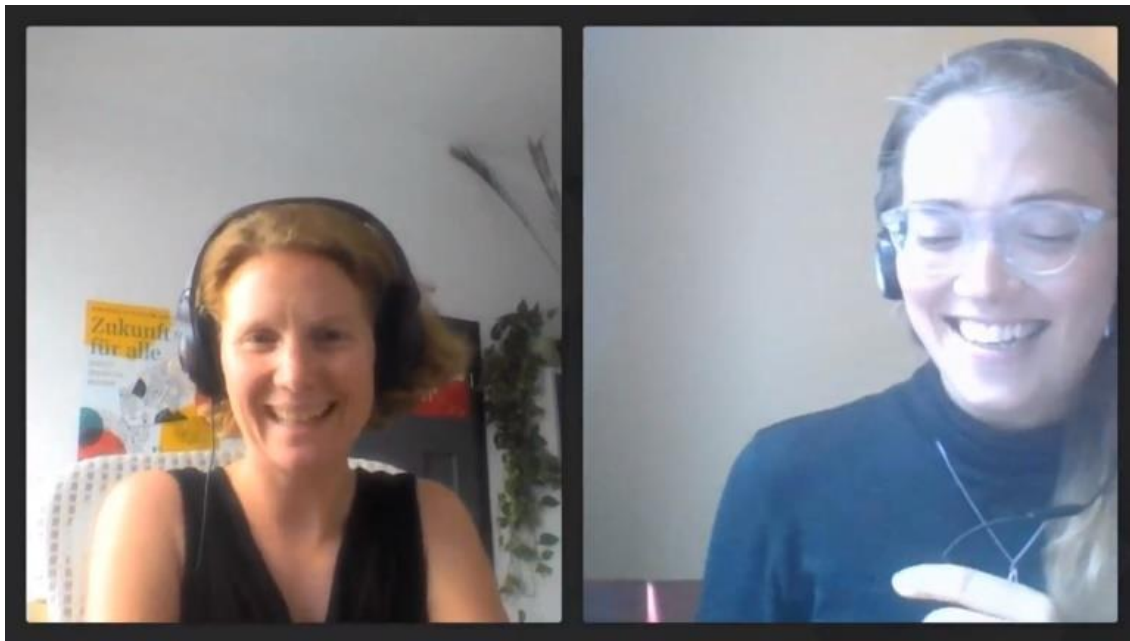

online presentations and to post the answers on the AEMS Discord server:

- What are the key messages of the presentation?
- What was new for you in the lecture?
- Is there something you did not understand?

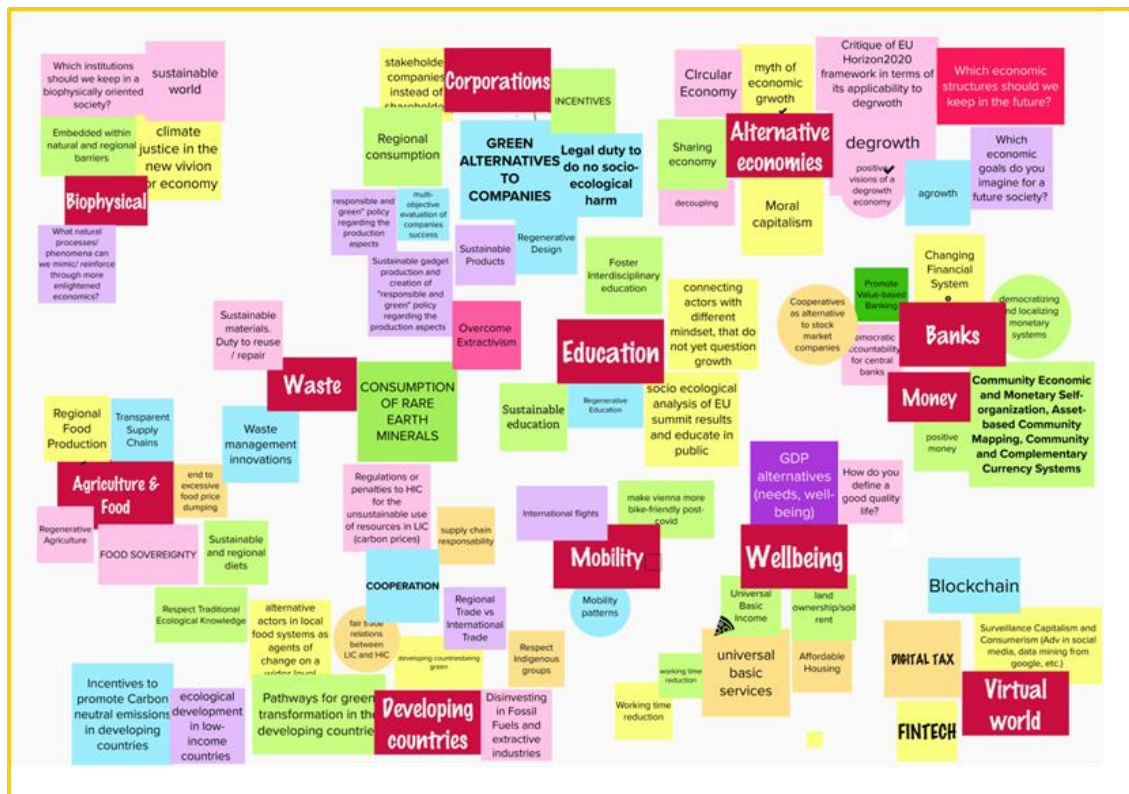

This helped the participants to enter into the discussion with the teachers in the afternoon. The online live-discussions started off with a check-in session via Zoom, in which the academic heads briefly went through the above-mentioned questions.

After the check-in, the speakers joined the Zoom Meetings. Students could now discuss directly with the two speakers in each session and ask questions. The academic heads moderated these rounds and also posed the students' questions from Discord and the Zoom Chat. The online teaching units concluded with a check-out

session in which students in small groups summarized the contents of the day and placed them in the overall picture of the AEMS program. Often they also worked out these summaries graphically in the form of murals. MURAL is a digital workspace for visual collaboration.

Halliki Kreinin (right) conducts an online interview with Degrowth expert Nina Treu (Screenshot)

Mural on the students' work by AEMS 2020 students

FIGHTING CLIMATE CHANGE IN TIMES OF HEALTH AND ECONOMIC CRISIS"

"The saddest aspect of life right now is that science gathers knowledge faster than society gathers wisdom."

Isaac Asimov

The kick-off event of the AEMS Summer School took place under the motto "Fighting climate change in times of health and economic crisis", at the Vienna University of Technology on July 20th 2020. The Austrian Federal Minister for Climate Action, Leonore Gewessler, held a keynote speech and had a discussion with a panel of experts.

In addition to the Federal Minister's keynote, the guests listened to speeches by the economist, Stephan Schulmeister (Austrian Institute of Economic Research), Helga Kromp-Kolb, Austrian's leading climate researcher, and Karin Stieldorf, head of the Master Program 'Sustainable Building' at the TU Vienna. Due to COVID-19

restrictions there was a long waiting list for one of the 100 seats in the venerable Kuppelsaal. However, in order to satisfy the great interest of the public and to spread the important message, the event was recorded and broadcasted online via live stream. More than 100 people attended the live broadcast and the recording has already been viewed 200 times.

With great interest the audience listened to Federal Minister Leonore Gewessler's presentation on the transformative role of Austrian climate policy at a national, European and international level. In her presentation "Only one planet: Boundaries economy must respect" Helga Kromp-Kolb demonstrated that the survival of humans

Federal Minister, Leonore Gewessler, speaks in front of the audience at Kuppelsaal, TU Vienna
@BMK / Cajetan Perwein

as a species is simply impossible with a constant focus on economic growth. The importance of sustainable construction was addressed by architect Karin Stieldorf and Stephan Schulmeister showed concrete steps towards a sustainable society, focusing on financial solutions for green growth. The presentations were followed by a panel discussion. The audience, both online and in person, were invited to pose questions to the panellists via the online tool Slido.

Topics of interest to the audience included the educational gap between rural and urban areas with regard to climate protection, cities as testing grounds for implementing ideas and testing new concepts, the necessity of a common European public transport and railroad

network and the main paradigms of capitalism and economic growth.

Before the evening ended, participants of both summer universities were introduced by personal video messages. In this way the guests were able to get to know this year's participants, their motivation, goals and expectations of the programs. The buffet afterwards was organized under strict COVID-19 measures. All food and beverages were of organic, vegetarian or vegan quality, and regional as well as seasonal. Also the coffee provided by Brigantes was shipped in a way that fully respects the environment, society and future generations. It is transported in the most climate friendly way, by sailing ship, from South America to Europe.

PARTICIPANTS

"Those who have seen through their existence cannot be stopped."

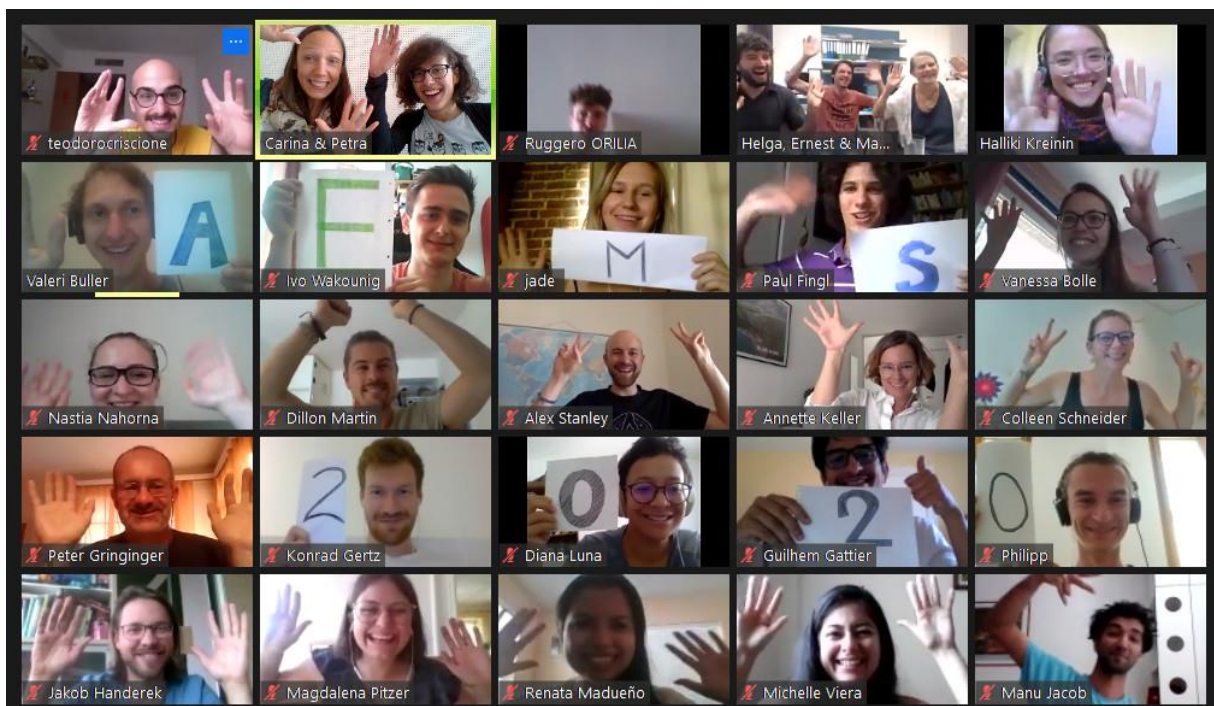

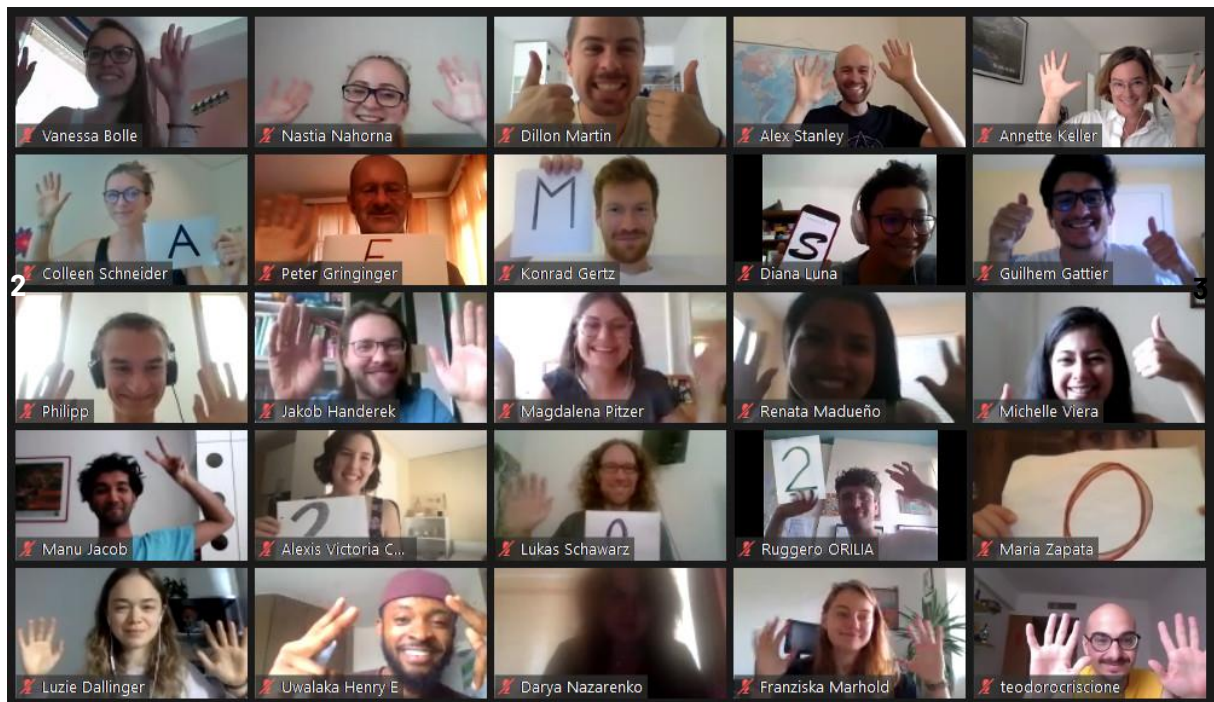

Confucius

36 people from 17 nations, located in 5 different time zones attended the very first online-AEMS in 2020. They came from countries such as South Africa, Nigeria, Mexico, the US, Australia, Vietnam, India, Egypt, Ukraine, and many other European countries. The image above shows the nationalities of this year's students, with the size of the bubbles indicating the number of students from the respective region.

A range in life experience. Our students are not only rich in cultural diversity, they also bridge a remarkable span in age differences: While our youngest participant was 18, the participant who had collected the most years was 53. But the AEMS not

only bridges diversity - it grows on it. It becomes even more eye-opening due to the manifold interests, and academic and professional backgrounds of its students. This diversity in nationalities, age, profession, field of study, and interests supports inter-group learning. It also contributes to the unique character of the Summer School.

It is not necessary to have an economic background in order to participate in the program. Anyone with an interest in learning more about the impact of our economic and monetary systems in relation to our limited natural resources is welcome to take part!

THE LECTURERS

Thanks to the digital implementation of this year's summer program, we were able to attract even more international speakers to provide contributions and discussions. The experts are mainly from the academic world and/or are activists. Their names in alphabetical order:

Ernest Aigner (Vienna University of Economics and Business)	Alf Hornborg (Lund University)
Stefania Barca (University of Coimbra)	Mira Kapfinger (Stay Grounded)
David Barmes (Positive Money)	Maximilian Kasy (University of Oxford)
Kurt Bayer (Vienna Institute for International Economic Studies)	Mathias Kirchner (BOKU Wien)
Fran Boait (Positive Money)	Helga Kromp-Kolb (BOKU Wien)
Brian Fath (IIASA)	Thomas Kubo (writer and publisher)
Christian Felber (Economy for the Common Good)	Wolfgang Lalouschek (planetYES)
David Frayne (writer and social researcher)	Friedrich Leitgeb (BOKU Wien)
Leonore Gewessler (Austrian Federal Ministry of Climate Action, Environment, Energy, Mobility, Innovation and Technology)	Thomas Lindenthal (BOKU Wien)
Ian Gough (London School of Economics)	Giuseppe Littera (Sardex)
Thomas Hahn (Stockholm Resilience Centre)	Irene Monasterolo (Vienna University of Economics and Business)
Gwendolyn Hallsmith (Global Community Initiatives)	Andreas Novy (Vienna University of Economics and Business)
	Thierry Philipponnat (Finance Watch)
	Patrick Scherhauser (BOKU Wien)
	Stephan Schulmeister (independent economist)

Sigrid Stagl (Vienna University of Economics and Business)

Karl Steininger (University of Graz)

Karin Stieldorf (TU Vienna)

Alexandra Strickner (Attac Austria)

Nina Treu (Konzeptwerk)

Bernd Villhauer (Global Ethic Institute)

Shermin Voshmgir (BlockchainHub)

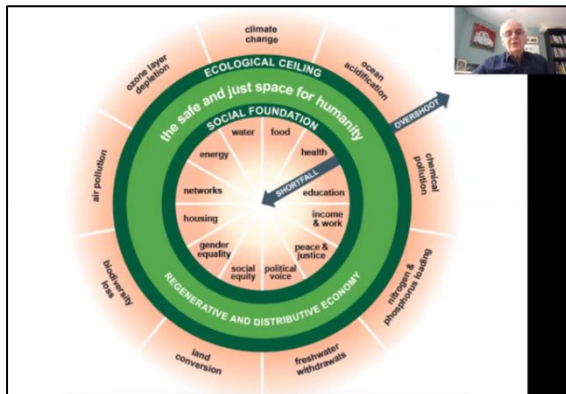

Peter Wahl (World Economy, Ecology & Development Association)

Beat Weber (Austrian Central Bank)

Richard Werner (Linacre College, Oxford)

Lino Zeddies (Activist, economist, author)

Christian Zeller (Paris Lodron University of Salzburg)

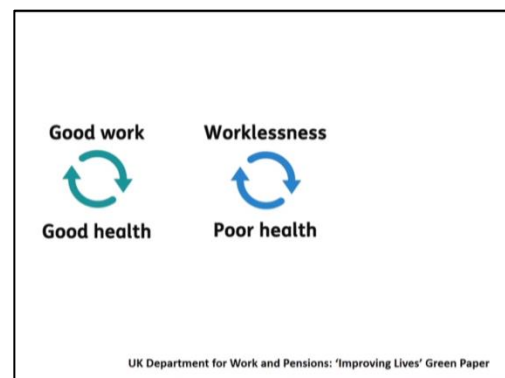

Ian Gough explains Kate Raworth's Doughnut Model in his lecture on Universal Basic Services (Screenshot)

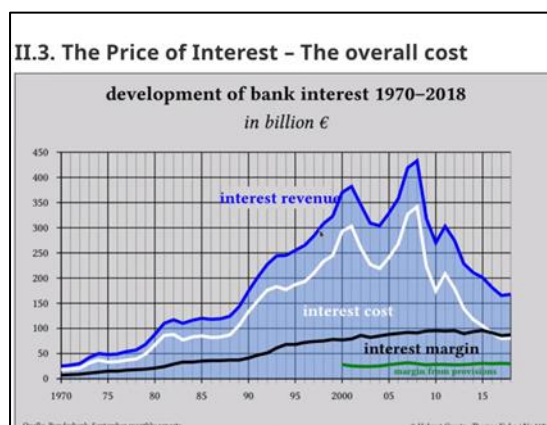

Karl Steininger talks about economic perspectives on new opportunities for tackling social ecological crisis due to corona. (Screenshot)

Gwen Hallsmith shares her experience in communal politics for alternative businesses and banks. (Screenshot)

David Frayne talks about the theory and practice of resistance to work (Screenshot)

Thomas Kubo presented Helmut Creutz's research on Compound interest. (Screenshot)

Lino Zeddies shares his Utopia 2048. (Screenshot)

THE SPIRIT OF AEMS

"Enlighten yourself, and then influence others by what you are."

Wilhelm von Humboldt

The Online-AEMS 2020 was a huge success and life-changing for many of the students! AEMS participants now know about the flaws of the current economic and monetary system and how they influence every one of us in our everyday lives. They were able to understand more about the impact of political measures on our financial systems during a global pandemic.

But, what's even more important is that they were inspired by the many ideas and innovative solutions that already exist. AEMS students take this proclaimed spirit of change back to their home countries, their families and friends, their work places and universities. Many of them are inspired to initiate their own projects in order to make a difference in the world.

Even though the AEMS program is over, students remain connected and exchange information about their ambitious projects and initiatives.

Although limited to digital media, many have found new friends and potential partners for their own ambitious initiatives. We are planning to foster the connection between all the current and preceding participants of AEMS and to give room to the many ideas for a good life for all – maybe even online, as we now know how to.

OUR GRATITUDE

"If you cannot do great things, do small things in a great way."

Napoleon Hill

We would like to thank **all participants, partners, sponsors and contributors** who made this event possible!

Many thanks to our **tutors, lecturers and speakers** for their much appreciated support and valuable inputs: Chiara Beck, Philipp Bohatschek, Petra Isepp; Stefania Barca, David Barmes, Kurt Bayer, Fran Boait, Brian Fath, Christian Felber, David Frayne, Leonore Gewessler, Ian Gough, Thomas Hahn, Gwendolyn Hallsmith, Alf Hornborg, Mira Kapfinger, Maximilian Kasy, Thomas Kubo, Friedrich Leitgeb, Thomas Lindenthal, Giuseppe Littera, Irene Monasterolo, Andreas Novy, Thierry Philipponnat, Patrick Scherhauser, Stephan Schulmeister, Sigrid Stagl, Karl Steininger,

Karin Stieldorf, Alexandra Strickner, Nina Treu, Bernd Villhauer, Shermin Voshmgir, Peter Wahl, Beat Weber, Richard Werner, Lino Zeddies and Christian Zeller.

Special thanks go to Dominik Bourret, Samuel Stuchetz and Nora Laufer. We also thank Nina Hainfellner for the high-quality photos.

Peter Kompatscher and the TU team made the live-stream of our opening event possible. For the people attending live, **Gaumenfreundinnen** offered their delicious vegan and vegetarian food and regional beverages, while **Brigantes** provided their sail-shipped coffee, underlining the importance of ecological awareness in our everyday lives.

AEMS will be back next year!
