watch Hector's video.

I come from Colombia and I am a Mechanical Engineer. I'm currently doing a Master's Degree in Sustainable Energies in Belarus. I learnt so much during the GBS programme. I met new people, which was a highlight for me.

My plan is to start my own company to build houses and what I've learned at GBS will help me reach that goal.

One of my teachers back in Belarus was also a past GBS participant, and she said, "It is one of the best experiences that you can take in Europe in this topic - you have to go!".

I recommend GBS to architects and engineers because it can help you to understand what is going on in the world.

**Green.
Building.
Solutions.**
