International students
and professionals

7 ECTS for
your studies

Hands-on
building designs

@gbsvienna

How can we shape climate-resilient cities and buildings?

Join our globally unique summer program and gain the latest insights in climate-proof design and sustainable architecture. Discover cutting-edge examples and innovative strategies for carbon-efficient construction, energy optimization and nature-based solutions.

Immerse yourself in a holistic and interdisciplinary learning experience, while living in a passive house!

Leverage your career and create impactful solutions

Expand your networks with over 600 alumni from more than 90 nations, connect with local building experts and find like-minded friends for life! Collaborate to design your own building project and enjoy activities such as a guided bike tour, sports events, waltzing and traditional Austrian dinners.

GBS thrives on collaboration, supported by multiple international partner universities and organizations – many offering scholarships. Learn more on our website and apply early!
