// It was three weeks packed with lectures, experts and discussions with people who are like-like-minded people.

We had a lot of fun and lots to do. We did a group project which I put more time and effort in than I expected to at the beginning, but I wanted to implement all the things I learned and it was totally worth it!

In the three weeks of GBS online 2020 I learned a lot about the possibilities of having a positive impact on our environment and my goal is to implement these experiences in my future career.

I had a great time, I made some new great friends and I can totally recommend the Green Building Solutions online university 2021.
